PROFESSIONAL SUMMARY

Software Engineer and MCA candidate with hands-on experience in full-stack web development, system analysis, and building scalable web applications using JavaScript, React.js, Python, MongoDB, and MySQL. Experienced in working with cross-functional teams to translate business requirements into technical solutions. Strong foundation in software engineering principles, REST API integration, database design, and agile development practices. Motivated to contribute to production-grade systems and data-driven decision-making in a global organization.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python
- **Frontend Technologies:** React.js, HTML5, CSS3
- **Backend & APIs:** RESTful APIs, Node.js (basic)
- **Databases:** MongoDB, MySQL
- **Software Engineering Concepts:** OOP, SOLID Principles, SDLC, System Analysis & Design
- **Tools & Platforms:** Git, GitHub, Jira, Power BI
- **Development Practices:** Agile/Scrum, Functional & Unit Testing (basic), CI/CD concepts

PROFESSIONAL EXPERIENCE

System Analyst

Jan 2024 – Sept 2025

- Acted as a bridge between business stakeholders and technical teams by gathering requirements and translating them into functional and technical specifications.
- Analyzed existing systems and workflows to identify automation, optimization, and digital transformation opportunities.
- Collaborated with developers to support implementation, testing, and deployment of web-based solutions.
- Performed data analysis and prepared reports using Excel and Power BI to support business and operational decision-making.
- Conducted quality checks and validation to ensure accuracy, reliability, and adherence to project standards.

Web Developer Intern

Dec 2022 – Sept 2023

- Developed and maintained responsive full-stack web applications using React.js, JavaScript, MongoDB, HTML, and CSS.
- Designed reusable React components and implemented CRUD operations integrated with backend services.
- Worked with REST APIs to enable seamless communication between frontend and backend systems.
- Collaborated in an Agile development environment, participating in sprint planning, debugging, testing, and feature deployment.
- Optimized application performance, accessibility, and SEO best practices to enhance user experience.

PROJECTS

Full-Stack Book Management System

- Designed and developed a MERN stack application to manage books, users, and transactions.
- Implemented RESTful APIs, database schema design, and validation logic.
- Ensured error handling, basic unit-level testing, and performance optimization.
- Used GitHub for version control and collaborative development.

E-Commerce Management System

- Designed and developed an E-Commerce Management System using **Python (Django framework)**.
- Implemented core modules such as product management, user management, order processing, and inventory tracking.
- Integrated **SQLite** for core transactional data and **MongoDB** for handling flexible product and user-related data.
- Developed REST-style views and backend logic to support CRUD operations and business workflows.
- Ensured data validation, basic security practices, and performance optimization for scalable usage.
- Used GitHub for version control and followed structured development practices.

EDUCATION

Master of Computer Application (MCA)

Savitribai Phule Pune University (SPPU) | Sep 2025 – Oct 2027 (Pursuing)

- Relevant Coursework: Data Structures, Software Engineering, Database Management Systems, Web Technologies, System Analysis & Design

Bachelor of Computer Application (BCA)

AM College | Aug 2019 – Aug 2022

- Relevant Coursework: Programming Fundamentals, Web Development, Database Concepts, Digital Marketing

CERTIFICATIONS

- Generative AI for Business Development
- Ethics in the Age of Generative AI
- Web Development Technologies
- Introduction to SOLID Principles

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Marathi
- **Work Authorization:** Eligible for full-time roles with flexible working arrangements
